Duane,

when we visited the site you took a GPS reading on the site. Do you have a map of the area? If so please send me a copy.

Brent Cox is the owner.

Wayne,

I've attached a PDF which I made from the ArcMap document for that case. The original BLM case file was UTU-86615, closed on September 30, 2011 by an administrative action from the BLM Denver NOC (National Operations Center). I've been told that the case should not have been closed by the Denver NOC because neither the operation nor the reclamation were complete. It was closed by an administrative action, and we normally don't do that - we usually require field verification before closing a case file. The UDOGM case file number is S/023/0096.

My understanding is that the operator currently has management permission to complete the actions which were authorized by a BLM decision at the time when the case was initiated. The goal is to complete clean-up and reclamation of the legacy site. The current operators were authorized to remove the legacy stockpiles, which left behind decades ago, by the BLM decision in 2008.

I delineated a surface disturbance area of 5.86 acres, but that delineation was very conservative. The coordinates at the approximate quarry center were:

426240 E

4368096 N

UTM Zone 12 N, NAD83 coordinates

elevation 1748 meters (5733 feet)

The date of the joint BLM/UDOGM inspection was August 22, 2013.

Best wishes,

Duane Bays
